TESTED FLEXIBLE COPPER BUSBARS

Cu-flex busbars ensure a prompt and professional execution of electrical connections. The busbars are supplied ready for use! This means that you do not have to spend time on shortening, stripping the wires, making holes, or complicated bends.

Cu-flex has been tested and approved under various circumstances by i.a. DEKRA and DNV/GL.

In addition Cu-flex is UL recognized in category "Component - Panelboard and Switchboard Accessories".

ADVANTAGES WITH A CU-FLEX BUSBAR

- Delivered ready for use
- No shortening, stripping or making holes for fitting required
- Multi-flexible
- Rated current at 30°C, up to 1040A
- Lengths 160 - 1120 mm
- Time-saving installation
- Does not contain dioxins
- Up to 1000V

BUSBAR WITH A MINIMUM OF MAINTENANCE

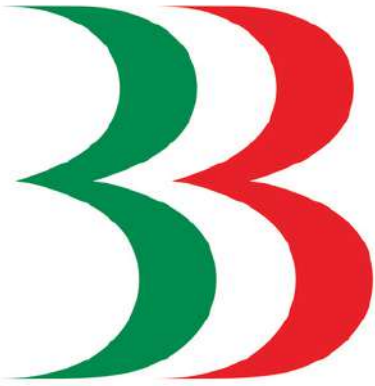

A Cu-flex copper busbar is made of copper wires that are woven to a flexible busbar. CUBIC's patented technique forges the ends of the busbar to a solid unit. No tin or the like has been added.

Thus obtaining a contact surface that makes it possible to produce maintenance-free connections.

Connection:
Busbar to busbar

Connection:
Between electrical components.

The solution for your Industrial Cooling needs

VENTILATION

When:

- outside air lower than inside (approx. $\Delta T = 10^{\circ}\text{C}$)
- low cooling capacity
- little maintenance
- clean ambient air

ROOF MOUNTING
Air Flow: 500 - 1870 m³/h

Black version available

DOOR MOUNTING
Air Flow: 35 - 850 m³/h

AIR CONDITIONERS

When:

- outside air higher than inside air
- ambient air extremely oily or dusty
- high cooling capacity: 330 - 10000W

www.demesne.ie/cosmotec

Air Conditionair range available in **OUTDOOR** (500 - 6000W) and **INDOOR** (360 - 10000W) Version
DOOR and **ROOF MOUNTING** (Indoor Only)

Katko is a Finnish family business specialising in safety switches, load break switches, fused switches and related accessories. With more than 70 years of experience, our product selection is among the most extensive in the world. It includes special products for demanding operating environments and critical locations.

Enclosed Katko safety switches from an extensive 10–1600 A selection. The right enclosure for all operating conditions.

Reliable main switches providing the best performance on the market, up to 800 A. Perfect compatibility and a wide selection of accessories.

Extensive selection of terminal blocks and cable connectors suitable for both aluminium and copper cables. Easy to install directly onto a DIN rail or with screws.

Direct current safety and load break switches for solar power installations. Weatherproof for different outdoor conditions.

Switches that allow for overcurrent protection in industrial and domestic environments.

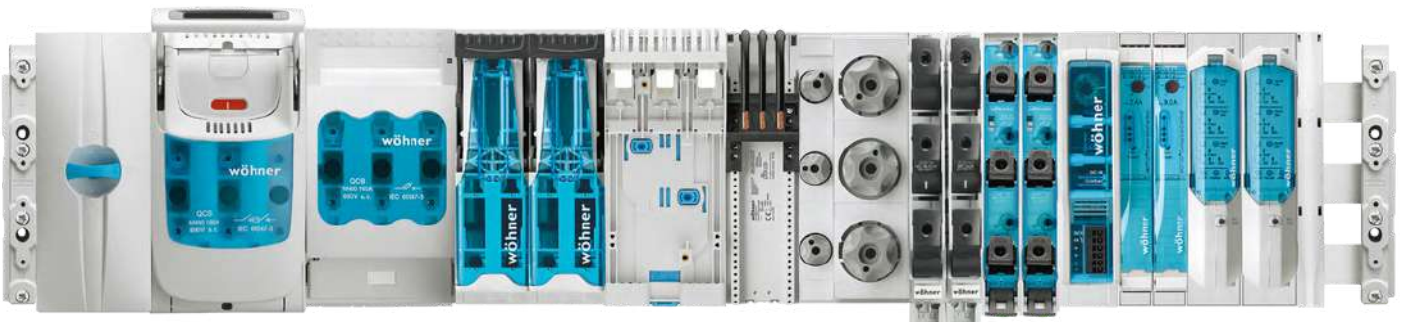

www.demesne.ie/katko

60Classic

Busbar system with a large selection of components for many applications

A busbar centre distance of 60 mm is the standard in most low-voltage distribution applications today. Developed by Wöhner, this standard has been implemented in the 60Classic system and has become the most common busbar system in many branches.

Two main reasons for its success: 60Classic is space saving and provides a huge selection of components. Depending on requirements, busbars of various cross sections can be used; currents up to a maximum of 2500 A are possible.

CT5 Modul-Compete 50

Competitive Simplicity

The cost-optimised CT5 has a central contacting and was developed exclusively for 24V DC operation. For standard applications where high quality and an attractive price are required, the CT5 is the right choice.

Series A

the Mighty

ASS-P is a 94 mm cubic-design multi-tone alarm sounder with max. 103 dB sound pressure. 8 tones can be selected via DIP switch.

Series Q

the Bright

The series Q is the largest and most comprehensive luminaire series in four sizes with a square design. The extensive product range is available in 94 mm, 132 mm, 184 mm and 228 mm sizes.

Series R

the LED Design Powerhouse

The new LED beacon series R is the brightest LED beacon in its category and is especially designed for maximum signaling effect.

Auer Signal is one of the world's leading manufacturers of signaling equipment and is present in over 70 countries today. Our products are planned, constructed and tested by our development teams. Innumerable test steps ensure the best product quality. Signaling devices from Auer Signal stand out from the crowd thanks to their innovative in-depth solutions and ingenious engineering. 300/500 V Cables

Cables of rated voltage 300/500 V, intended for incorporation in internal wiring and electrical panels, lighting,

PVC Cables

Flexibility and robustness for installation in conventional applications.

450/750 V Cables

Cables with rated voltage 450/750 V intended for use in protected permanent reception facilities in homes, premises, ...

HFFR Cables

Safety for people and for facilities with special protection against fire as well as reduced emissions of acidic, toxic gases and opaque.

Cables 0.6 / 1 kV

Cables of rated voltage 0.6 / 1 kV intended for indoor or outdoor reception facilities, buried or aerial and connections in industrial environments, lighting ...

Armoured Cables

Specially designed for installations with risk of fire and explosion on mechanical strength and protection from rodents.

Instrumentation and Control

Cables intended for installations where it is required to minimize the effect of electromagnetic radiation to ensure the reliability of the signals.

Bare Copper

Rigid or flexible for conducting ground connections and special applications.

Prewired

Tube ICTA 3422 750 N combined with halogen-free cables for the most common installation.

Cables Automotive

Cables resistant to high temperatures, resistant to gasoline and oil, with special configurations of copper, for the interior of vehicles.

Cables For Toys

Nontoxic Cables suitable for incorporation into the toy industry in which it ensures the safety of users that these products are intended.

Cables, accessories and connectors.
Everything from one source.

ÖLFLEX® CLASSIC 110

The ÖLFLEX® Classic 110 YY multi-core number coded range is ideally suited for use as a control, signal and power cable in a variety of applications. Its high flexibility ensures easy installation whilst the tough external sheathing will resist the effects of many acids, caustic solutions and various oils.

ÖLFLEX® CLASSIC SY

Having all of the benefits of the standard ÖLFLEX® Classic range SY cable has the additional protection of a galvanised steel wire braid and transparent PVC outer sheath. It retains flexibility and ease of installation and offers a high degree of mechanical protection often extending the service life of an installation. Ideal for many industrial applications including the machine tool industry, where the extra protection of SY will prove invaluable.

ÖLFLEX® CLASSIC 115 CY

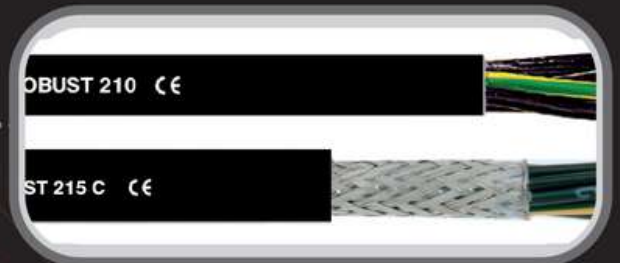

The ÖLFLEX® Classic 115 CY has a tinned copper braid for all applications with particular reference to EMC critical installations. The ÖLFLEX® Classic 115 CY can be used in fixed installations or where non-continuous but flexible movement is required. At room temperature they are widely resistant to acids, caustic solutions and oils.

ÖLFLEX® ROBUST 210 & 215C

ÖLFLEX® ROBUST 210 & 215C are control cables for flexible and fixed installations

for robust mechanical use. At room temperature they have increased resistance against acids, caustic solutions and certain vegetable, animal and mineral oils. This range of cables are ideally suited for use in agricultural, food, beverage and pharmaceutical industries.

ELLIS

Holding Power

Ellis is the global leader in the design and manufacture of cable cleats and fixing solutions. In-house engineering capabilities allow for constant innovation and the creation of bespoke solutions for individual project specifications. Our strong network of worldwide distributors help to deliver technical expertise to secure projects around the world.

INDUSTRIAL CABLE CLAMP

Manufactured as standard in black LLDPE. Used to fix power cables in indoor and outdoor applications.

EMPEROR TREFOIL

Heavy duty compact stainless steel cable cleat, for cables in single or trefoil formation.

ONE HOLE CABLE CLAMP

Light duty cable clamp for single cables. Available in aluminium, black polypropylene or a zero halogen, low smoke and fume nylon.

VULCAN+

Standard duty compact stainless steel cable cleat, for cables in single, trefoil or quad formation.

TWO HOLE CABLE CLAMP

Standard duty cable clamp for single cables. Available in aluminium, black polypropylene or a zero halogen, low smoke and fume nylon.

ALPHA

Light duty compact aluminium cable cleat, for cables in trefoil formation.

TRIDENT

Standard duty polymer cleat for cables in trefoil formation. Also available with spacer for a wider range take.

PEGASUS & GALVANISED STEEL CABLE HANGERS

Pegasus non-metallic hangers manufactured in a high strength nylon, are corrosion resistant and can be fitted in the harshest of environments. Standard galvanised steel hangers have been updated to be kinder to cables and prevent snagging on rough edges.

Plasticised PVC flexible conduit

A full range of accessories available

IBOCO offers a comprehensive range of flexible conduits and accessories, useful for a broad spectrum of applications, from protecting fiber optic cables to installing instrumentation or control cables.

www.demesne.ie/iboco-conduit

Oltre ai prodotti standard, EURO 2000 si è specializzata nella produzione di guaine con rivestimenti speciali:

1. Guaine **halogen free** senza emissione di fumi tossici. Testate in accordo alle nuove norme CEI 11170 normativa fuoco fumi ferroviaria.
2. Guaine **alta e bassa temperatura DMC ABT, DMC ABTX e DMTLNX** **trecciate in lana di vetro.**
3. Guaine **per la protezione contro i campi elettromagnetici EMP SCREENING** **guaine tipo DMC EMP, UALT 2000, DMT EMP.**
4. **Guaine raccordi e tubi certificati RINA. Certificato n. ELE308410CS**

Apart from the standard items, EURO 2000 is specialized in the production of conduits with special coverings:

1. **Halogen free** conduits without the emission of toxic smokes. Tested according to new norms CEI 11170 (norm about fire and smokes).
2. **High and low temperature DMC ABT, DMC ABTX and DMTLNX conduits braided through fiberglass.**
3. Conduits **for the protection against electromagnetic fields EMP SCREENING. DMC EMP, UALT 2000, DMT EMP conduits.**
4. **Conduits, fittings, tubes certified by RINA. Certificate n. ELE308410CS**

Standardizzando e razionalizzando una serie di raccordi modulari che permettono l'adattabilità e il montaggio dello stesso raccordo su tutti i tipi di guaine con la possibilità di poter realizzare raccordi speciali per ogni tipo di esigenza.

We standardize and rationalize a modular fittings that can be adapted and assembled on any kind of conduit with the possibility of creating special fittings to satisfy your exigencies.

Unificazione dello stesso raccordo su tutti i tipi di guaine flessibili sia metallici che plastici, questo comporta una maggior razionalizzazione delle scorte e una miglior flessibilità in fase di installazione dei materiali.

Unification of the same fitting on any kind of flexible conduit (both metal and plastic). This implies a greater rationalization of the stocks and a better flexibility during the materials's setting.

Filoform, part of the CRH Group, Manufactures a vast array of products that have been developed to connect, seal and protect underground cable and ducting infrastructures. IDEAL INDUSTRIES EMEA is part of **IDEAL INDUSTRIES, INC.**, a global, diversified business designing and manufacturing superior product and tools for professional tradesmen in the electrical, data communications, aerospace, automotive and construction industries.

IDEAL Gen II Lever wire connectors:

- Modern alternative to traditional strip connectors
- Reusable
- For solid, stranded or flexible cables.
- Clear shell for verification of connection
- Up to 4.0 mm² cables
- 32A/450V

IDEAL SpliceLine wire connectors:

- Excellent for extending and connecting wires
- Only in-line push in on the market
- 3x faster to install than traditional crimped butt splices
- Up to 4.0 mm² for solid and 2.5 mm² for stranded
- 32A/450V

IDEAL Push In wire connectors:

- Reduce installation time by up to 50%
- Perfect replacement for crimped splices
- Up to 4.0 mm² for solid and 2.5 mm² for stranded
- 32A/450V

IDEAL FT-45™ Modular Plug Solution:

- 70% faster/ 90% more accurate than traditional RJ solutions
- The FT-45™ is a simple, compact and highly effective crimp tool for installers and technicians that terminate RJ-45 connectors regularly.
- Feed-Thru enables simple verification of wires
- Enables conductors to be cut flush with the end face of the connector when used with the FT-45™ tool.

AUTOMOTIVE AND INDUSTRIAL - DSG-CANUSA PRODUCTS

Ensure electrical and mechanical reliability with the engineered products and solutions of Shawcor's Automotive and Industrial Group.

Heat Shrink and Cold-Applied Cable Accessories

Spanning a wide range of physical property characteristics—including shrink ratio, operating temperature, fluid compatibility, flammability and temperature resistance—and available in multiple designs, our heat shrink tubing provides electrical insulation, environmental sealing and strain relief in an endless number of industries and applications. We also offer a variety of low- and medium-voltage cable accessories to terminate and splice utility and industrial cables, as well as equipment insulation and connection for environmental sealing, flashover protection and more.

Electrical Utility

Medium and Heavy Wall Products

- Heat Shrink and Cold Applied Sleeves
- Adhesive lined or Single Wall
- Up to 6:1 Shrink Ratio
- From .35" to 9"
- UL, CSA and ANSI rated
- Multiple colors and clear
- Electrical Insulation up to 2kV

Specialty Products

- Wrap around repair and re-jacketing sleeves
- Cable End Caps
- Elbow Sealing Kits
- Airport lighting kits
- Cable Break out Boots

Medium Voltage Terminations

- CT Series Heat Shrink Terminations
- IEEE 48 Class 1 Qualified for 5 to 35kV
- 6 AWG to 2500kcmil
- Designed for Shielded, Non-Shielded, JCN, LC Shielded Cables

Medium Voltage Splices

- CSJ Cold Shrink Splices
- CJ Series Heat Shrink Splices
- IEEE 404 qualified for 5 to 35kV for straight and transition splices
- 8 AWG to 1750 kcmil
- Designed for Shielded, Non-Shielded, PILC, JCN Cables

Tapes

- Professional Grade and General Purpose
- Electrical Insulation and Protection up to 600V
- Specialty Tapes for Environmental Sealing, Fireproofing, Corrosion and Mechanical Protection
- UL and CSA rated

Accessories

- 3/C Conversion Kits
- Connectors (lug, barrel and stem)

OEM

Thin Wall Products

Single Wall

- Up to 4:1 Shrink Ratio
- From 3/64" to 5"
- UL, CSA and QPL rated
- Multiple colors and clear

Adhesive Lined

- Up to 4:1 Shrink Ratio
- From 1/8" to 2"
- UL, CSA and QPL rated
- Multiple colors and clear

Specialty Automotive Products

- Splice Sealing
- Water Blocking
- Terminal Sealing
- Hose and Pipe Protection

Heat Shrink Application Equipment

- High Speed Belt Heater Ovens
- Custom Designs
- On-Board Splice Sealing
- Discrete Bench and Top Heaters
- Shuttle Ovens
- Splice Sealing Heaters

EMERSON™

The simple solution for safe maintenance

Stay Safe, lock Off and prove dead with the new Martindale VIPDLOK-S Kits

Martindale Electric is one of the most trusted brands in electrical safety testing and is the market leader in Keeping you Safe with safe isolation equipment.

Martindale's cost effective solutions for compliance with Electricity at Work Regulations are essential when maintaining electrical plant and equipment, and enable you to respond quickly, efficiently, and safely to issues that arise in your working environment.

In addition to the industry standard safe isolation kits and socket testers, Martindale Electric's product range includes 18th Edition installation testers, portable appliance testers (PATs) and environmental testers essential for maintaining a safe and healthy workplace.

Combined Voltage indicators & lock kits

NEW Proving devices

PAT testers

Identify your network with confidence

Brady utilises the greatest product range on the market to offer a complete identification solution in any context. This means Brady can bring you these advantages:

- Best in class industry materials
- Industry leading rugged printers
- Service that is second to none
- Quick lead times
- European wide product approvals
- Labelling on the move

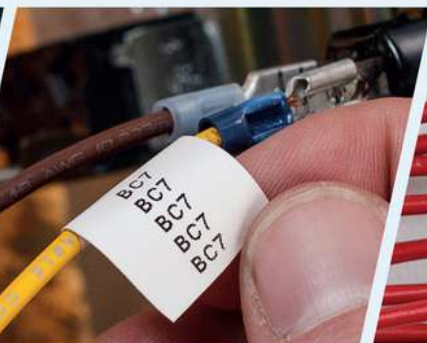

BMP21-PLUS

BMP71

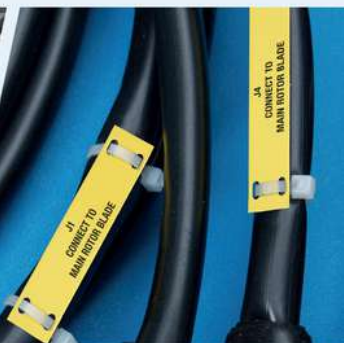

Self-laminating labels (B-427)

Nylon cloth wrap-around labels (B-499)

Shrink sleeve wire markers (PermaSleeve B-342)

Halogen free cable tags (B-7643)

Solutions for hazardous energy control

Brady was the first to respond to the new OSHA legislation in the U.S. in 1990, and has maintained its position as a leading Lockout solutions provider ever since. Today, Brady offers a comprehensive package for Lockout/Tagout compliance.

Partex - Leading The World In Cable Identification

Most professional wiremen are aware of the user friendly benefits of the Partex PA marker which have made it the world's leading cable marker.

Spring-action bellows reduce the number of sizes required.

Hot foil marking for permanence and clarity of ident.

Soft Cadmium free PVC, easier on the fingers.

Competitive pricing from our huge stocks.

Secure anti-twist interlocking system.

Available off the shelf in Black/White, Black/Yellow or International, resistor colour coded.

Available in loose pack form, reels, discs or our handipack.

Marker kits for site/panel work also available as standard including our 18 compartment PAL assortment box, CAS refillable 'pocket size', cassette dispenser and MDH20 keyring dispenser,

www.demesne.ie/partex

Complimenting our best selling PA range are the hugely popular PC clip-on and PCA snap-around post termination markers, PLD wrap-around range and PK2 together with PKS stainless steel ranges for larger diameter cables.
